

I don't want to do this anymore. I feel like I can't complete my degree because I don't have the mental, physical, emotional and psychological strength to carry on.

I'm so near yet so far with only this semester and next semester till completing my degree but everything is so hard.

I have so many readings left unread, assignments are starting to pile up and I'm so tired and I can barely breathe.

On top of the academic stress, I'm also stressed out by my declining mental health - I keep getting panic and anxiety attacks that are overwhelming, feeling giddy and faint and fainting several times from anxiety, and in general weakness, nausea, headaches and chest pain and muscle pain that comes with the anxiety and stress even though I didn't exert myself physically in any way.

I lost track of the amount of times I broke down but the depression today is so bad I literally have no energy to do anything and I want to cry but I wasn't able to cry because I felt so tired and overwhelmed.
